## Summary

I am a passionate **full-stack software engineer**. I love learning new languages and frameworks and can be a strong asset to a team that is based on collaboration and creativity.

I obtained my master's degree in France in 2011 and started to work right after as a Java EE developer in Paris. Last year I got my **Spring Core Specification**.

Paris is a great Tech city but I always wanted to experience the New York's work culture, so I moved here to discover new opportunities.

For the last 5 years I've been working on the e-commerce web applications of big companies like Accor or Dior. For example my last project at Dior.com was developing a REST service for the brand new checkout funnel with Java/Spring.

My experience is mostly a back-end experience. I develop with **Java, Spring, Tomcat, Maven, JSP, MySQL, PostgreSQL, Hibernate** ...etc. But I also have a good front-end experience with **HTML5/CSS3/Javascript, Twitter Bootstrap, JQuery and AngularJS**.

On the side, I try to keep learning, taking classes on Coursera.com, currently I am attending a **NodeJS/MongoDB** course. And I also develop a **RESTful back-office application** for a Bed & Breakfast in France with Dropwizard and AngularJS.

Today I am looking for a **full-stack position, which** offers opportunities to develop my skills and learn new ones. I am not very comfortable with competition; instead I prefer environments of **collaboration, mutual respect**, and with opportunities for **learning, creativity, and mentorship**.

I am a very good team player, familiar with **Agile Methodologies** such as **Scrum, TDD, Kanban**, etc.

## Experience

**October 2014 - October 2015 (1 year)**

**Java Web Developer at Dior (LVMH) - Paris, France**

Developing the Dior Fragrance and Beauty e-commerce website in a team of 5 developers

- Development of the Dior's new checkout funnel for 3 markets (Japan, USA, France)
